Not 'classified' by anyone or any process; did cause tumors in the rat study, just don't really know if it is mostly PPAR mediated, i.e., they didn't do any mechanistic work one way or another

Comment in the attached. Tala- I thought Genx was not classified for cancer?

Importance: High

Nancy/Charlotte/Erik, any additional comments on these?

Due COB today to OW. Perhaps there's approved language for "What is a tox assessment?" (Q in the fact sheet). Leaving at 11:30 for a Drs. appointment but will be back after that.

Thanks, Tala and OPPT.

Here's the fact sheets and press release OW put together for the GenX tox values. Can you get me any comments by noon tomorrow so I can also give to Nancy et al to review? Thanks.

Subject: FOR REVIEW: PFBS and GenX Communications Materials

Hi all—

Please find attached draft communications materials for the Genx/PFBS toxicity assessment rollout for your offices to review. I flagged that these were coming on the PFAS committee call yesterday, so hopefully your folks should be aware.

I have attached three fact sheets and a press release. We continue to work on internal Q&As and will provide those as soon as they are ready.

As far as timing, we are briefing the Acting Administrator on Friday on the assessments and the roll-out. If you have any comments that you'd like us to consider before that briefing, please send those to me by **COB tomorrow**. If you can't close your comments out tomorrow, please try to do so by COB Friday.

If you have any questions and or want to talk through the announcement and/or next steps, please don't hesitate to give me a call. I will be sharing these documents with our interagency comms workgroup (likely on Friday afternoon), with the hope of finalizing the materials sometime next week.

Thanks so much!

-Andrea-
